Is the LP-20 defibrillator in the “ready mode?” Defend your answer:

100% (non-rebreather) oxygen mask.

Did you know??? We have three different central line kits in the bottom drawer of the crash cart. Make sure you are using the right one for a given situation!!!

8.5 Fr introducer, sometimes called a “Cordis”	Used for large volume resuscitation
16g single-lumen CVP catheter	Often used as a femoral art line Can be used as a venous line
Triple lumen CVP catheter	Good for general central acces
