

Hoisting PV panels to Building 100 rooftop utilizing a 70-ton crane.

**VA Palo Alto Health Care System, Palo Alto, CA | 264.9 kW DC Solar Photovoltaic (PV) System**

These 1,120 solar panels on the VA Palo Alto campus will produce 39,600 kilowatt hours per month, and offset 4% of the electricity needs of the campus. The system will reduce the carbon footprint of the campus by 6,100 tons over the first 25 years of production.
